

Manufacturer: MAC Closures Inc.  
Model: FTCT 19000, FTCT 19500  
ASTM Type: III

Description:

This is a one piece plastic snap closure with a captive hinge. There are two versions of this snap closure, which are the FTCT 19000 (see bottle and closure on the left in Figure 1A) and the FTCT 19500 (see closure on the right in Figure 1A). Both versions of the snap closure look alike.

Figure 1A

Figure 1B

The FTCT 19000 snap closure is permanently snapped onto the container neck finish (see bottle and closure on the left in Figure 1B). The FTCT 19500 snap closure has a plastic bottom part that snaps into the closure to form a compact package for dry products e.g., tablets (see the interior of the bottom of closure on the right in Figure 1B). Both the FTCT 19000 and the FTCT 19500 closure are opened by squeezing two arrows 180° apart on the back and front of the closure skirt (Figure 1A), which causes the top part of the closure to pop open (Figure 1B). In the closed position the top part of the closure has a small tab (see aqua arrow in Figure 2) that locks into a lip above the arrow on the bottom part of the closure at the front (see aqua arrow on the bottom part of the closure in Figure 2).

Figure 2

The manufacturer's instructions on the closure are (Figure 3):
